### RESEARCH EXPERIENCE

### **Estimating Empirical Measures in Many Particle Systems**

Penn State

Research Project

Summer 2017

o Advised by Prof. Mykhailo Potomkin, Penn State. Supported by an NSF grant of Prof. Leonid Berlyand, Penn State. The goal of the project is to approximate empirical measures of interacting particle systems with random initial data in Wasserstein metrics in order to reduce computational complexity of solving the corresponding mean field Vlasov equations.
